SUMMARY

Computer Science student at BRAC University (graduating January 2027) seeking a Software / Backend Engineer role. Experienced in building full-stack web applications and REST APIs with Node.js/Express, MongoDB, MySQL, Java and Python, with a strong foundation in data structures, algorithms and OOP.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, C++, PHP, SQL
Web & Backend: Node.js, Express.js, React.js, MERN Stack, MVC Architecture, REST APIs, HTML, CSS, JWT authentication
Databases: MySQL, MongoDB, Mongoose, Database Design
Tools & Concepts: Git, GitHub, Data Structures & Algorithms, OOP, OpenGL, Postman, Linux, Agile/Scrum

PROJECTS

University Marketplace for Secondhand Products , *React.js, Node.js, Express.js, MongoDB*
- Developed a full-stack marketplace for university students to buy and sell used products.
- Built RESTful APIs with Node.js and Express.js for JWT-based authentication (passwords hashed with bcrypt), product management, and user interactions.
- Designed responsive React.js user interfaces for browsing and posting products across screen sizes.
- Modeled users and listings with Mongoose schemas in MongoDB, following MVC structure.

Semantic Analyzer , *Compiler Project; Flex, Bison (YACC), C/C++*
- Built a semantic analyzer using Flex for lexical analysis and Bison grammar rules for parsing.
- Debugged and refined the grammar so error and log output matched reference specifications.

Hospital Management System , *Java, MySQL*
- Designed a Java desktop application to manage patient records, appointments, and hospital operations.
- Implemented MySQL connectivity for storing and retrieving records; applied object-oriented design to structure reusable classes.

Travel Management System , *PHP, MySQL, HTML, CSS, JavaScript*
- Built a web-based system for managing bookings and travel packages with a PHP back end and user authentication.
- Designed relational MySQL schemas for users, packages, and bookings and implemented CRUD functionality.

3D-Arrow-Shooter , *C++, OpenGL*
- Developed a 3D game with camera movement, collision detection, and interactive gameplay. Applied graphics concepts, including rendering and object transformations, to build the 3D scene.

EDUCATION

B.Sc. in Computer Science, *BRAC University* 01/2023 – Expected 01/2027 | Badda, Dhaka
CGPA: 3.11/4.00

Higher Secondary Certificate, *Dhaka City College* 2020 – 2021 | Dhanmondi, Dhaka
GPA: 5.00/5.00

Secondary School Certificate, *Bindubasini Govt. Boys' High School* 2014 – 2019 | Tangail
GPA: 5.00/5.00

EXPERIENCE

Winder, *Operations Manager* 04/2025 – Present
Part-time
- Manage a small team, assigning tasks and coordinating day-to-day operations.
- Communicate and negotiate with vendors to keep supply and service delivery on schedule.
- Prepare operational reports to track performance and support management decisions.

LEADERSHIP & VOLUNTEERING

Nafahat Foundation, *Founding Member* 01/2025 – Present | Tangail, Bangladesh
- Part of the founding team that launched the foundation's work with disadvantaged families.
- Raised BDT 4 lakh+ (about $3,300) in donations to fund food, clothes and self-employment support.

Hashimukh, *Founder* 05/2018 – 08/2023 | Tangail, Bangladesh
Student-run humanitarian organization
- Built and led a network of 100+ student members from schools and colleges across Bangladesh, along with partners and supporters.
- Organized educational support for disadvantaged families, social welfare events, and disaster recovery assistance.
