SUMMARY

Computer Science student at BRAC University (graduating September 2026) seeking a Software / Backend Engineer role. Experienced in building full-stack web applications and REST APIs with Java, Node.js/Express, MongoDB, MySQL and Python, with a strong foundation in data structures, algorithms and OOP. Combines hands-on development with real-world experience managing a team, vendors and operational reporting as an Operations Manager, and with founding and leading a student-run humanitarian organization.

EXPERIENCE

Winder, *Operations Manager* 2025 – Present
Part-time
- Manage a small team, assigning tasks and coordinating day-to-day operations.
- Communicate and negotiate with vendors to keep supply and service delivery on schedule.
- Prepare operational reports to track performance and support management decisions.

EDUCATION

B.Sc. in Computer Science, *BRAC University* 01/2023 – 01/2027 | Badda, Dhaka
currently studying

Higher Secondary Certificate, *Dhaka City College* 2020 – 2021 | Dhanmondi, Dhaka
GPA: 5.00/5.00

Secondary School Certificate, *Bindubasini Govt. Boys' High School* 2014 – 2019 | Tangail
GPA: 5.00/5.00

LANGUAGES

Bengali
Native

English
Professional working

Hindi
Conversational

ACADEMIC & PERSONAL PROJECTS

University Marketplace for Secondhand Products, *React.js, Node.js, Express.js, MongoDB*
- Developed a full-stack marketplace for university students to buy and sell used products.
- Built RESTful APIs with Node.js and Express.js for authentication, product management, and user interactions.
- Designed responsive React.js user interfaces for browsing and posting products across screen sizes.
- Integrated MongoDB for persistent storage of user accounts and product listings; managed version control with Git and GitHub.

Semantic Analyzer, *Compiler Project; Flex, Bison (YACC), C/C++*
- Built a semantic analyzer using Flex for lexical analysis and Bison grammar rules for parsing.
- Debugged and refined the grammar so error and log output matched reference specifications.

Hospital Management System, *Java, MySQL*
- Designed a Java desktop application to manage patient records, appointments, and hospital operations.
- Implemented MySQL connectivity for storing and retrieving records; applied object-oriented design to structure reusable classes.

Travel Management System, *PHP, MySQL, HTML, CSS, JavaScript*
- Built a web-based system for managing bookings and travel packages with a PHP back end and user authentication.
- Designed relational MySQL schemas for users, packages, and bookings and implemented CRUD functionality.

3D-Arrow-Shooter, *C++, OpenGL*
- Developed a 3D game with camera movement, collision detection, and interactive gameplay.
- Applied graphics concepts including rendering and object transformations to build the 3D scene.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, C++, PHP, SQL Web & Backend: Node.js, Express.js, React.js, MERN Stack, REST APIs, HTML, CSS Databases: MySQL, MongoDB Tools & Concepts: Git, GitHub, Data Structures & Algorithms, OOP, OpenGL, Flex, Bison (YACC) Interests: Artificial Intelligence, Applied Machine Learning, Computer Networking

LEADERSHIP & VOLUNTEERING

Hashimukh, *Founder* Tangail, Bangladesh
student-run humanitarian organization
- Built and led a network of 100+ student members from schools and colleges across Bangladesh, along with partners and supporters.
- Organized educational support for underprivileged children, social welfare events, and disaster recovery assistance.

Nafahat Foundation, *Founding Member*
- Work with underprivileged communities as part of the founding team.
- Collected BDT 4 lakh+ in donations, contributing to the well-being of underprivileged communities
